

Xerox le Disc Duplicators

Inexpensive and Reliable In-House Disc Production

The Xerox le Duplicator is a fast and convenient way to make numerous copies of CD and DVD discs. With its quick and reliable duplication functionality at an affordable price point, the range of Xerox le Duplicators are suitable for any user. Each model offers units with the ability to produce from 1 up to 15 copies simultaneously from a single up to 15 copies simultaneously from a single master source.

Standalone operation

The Xerox Duplicator can operate independently from a PC. The entire unit is operated from an easy to use LCD interface on the top front panel.

Account management (password protection)

This function will authorize only specific user(s) to operate the duplicator with their preferred settings. Multiple users can be created, each with their own unique password.

Patented Aluminum Case

The unique and stylish aluminum case offers protection against dust and heat, which are the leading factors in premature drive failure. The aluminum case will defuse the internal heat much quicker than standard steel cases and the drive bay doors will prevent dust from settling inside the drives extending the overall lifespan of the duplicator.

Supports all formats of CD and DVD

Xerox Duplicators support all common recordable and rewritable CD and DVD formats as well as special items including CD-TEXT, ISRC, and Over-Burned CD.

Large capacity buffer memory

When making copies from the reader, large capacity buffer memory allows more data to be stored in flash from 8MB up to 256MB (depending on the model). It keeps all drives burning at the same speed without pausing (known as buffer under-run) for a more stable and reliable duplication at higher burning speeds.

Xerox Ie Disc Duplicators

DVD Model #	D101le	D103le	D105le	D107le	D109le	D1011le	D1013le	D1015le
